

Tasking Memorandum No. 98-186

Memorandum For Cdrs DCMDs and Cdrs CAOs

Subject: New IP Addresses for the ACO Mods Module

Date: June 9, 1998

Suspense Date: July 9, 1998

Target Audience: District Commanders, District Administration and Information Services Personnel, CAO Commanders, CAO ADP Support Personnel, and all Contract Administration Personnel.

New Information:

1) OPENLINK CONVERSION TO NEW INTERNET PROTOCOL (IP) ADDRESS AND DOMAIN NAME CHANGE: On June 8, 1998, ACO Mods was unable to call openlink and download MOCAS data. The problem resulted from the Defense Megacenters (DMC) Columbus converting IP addresses to domain names on all of their computers over the weekend of June 6 – 7, 1998.

2) ACO MODIFICATION MODULE REHOST: In July 1998, ACO Mods will be rehosted to a DMC Columbus T520, domain name "Elmer." At that time, the IP address in the TNS names file must be changed to reflect the new domain name (elmer.cols.disa.mil), see instructions below.

New Tasking:

1) OPENLINK CONVERSION TO NEW IP ADDRESS AND DOMAIN NAME CHANGE: To fix the June 8 problem, all ACO Mods users must have their ACO Mods .ini file modified to reflect the new IP address for openlink (131.64.12.10), see instructions below. ADP support at each CAO shall be responsible for effecting this change.

2) ACO MODIFICATION MODULE REHOST: In July 1998, ACO Mods will be rehosted to a T520, domain name; elmer.cols.disa.mil. At that time, the IP address in the TNS Names File must be changed to reflect the new domain name, see instructions below. ADP support at each CAO shall be responsible for effecting this change.

Requirements:

1) OPENLINK CONVERSION TO NEW IP ADDRESS AND DOMAIN NAME CHANGE: The IP address for openlink shall be changed immediately on every user's PC:

From: 131.74.3.73 To: 131.64.12.10

To change this address, double click on My Computer (File Manager if you are running windows 3.1.1.). Double click on the Main or C-directory. Next, look for the directory called acomod. In that directory there will be a file called aco.ini. Below is a copy of how the aco.ini should look after the change. The only change required is to the OPENLINK Host address.

[INITIALIZE]

MAIN_PATH=c:\acomod\

DELRINA_PATH=c:\formflow\

FINAL_SF30_PATH=j:\acomod\s30\

BUBBLE_HELP=OFF

[OPENLINK]

HOST=131.64.12.10

SERVICE=2029

[DATABASE]

SERVER=[or7]acomod

DBASE=acomod

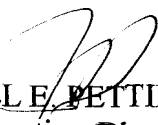

2) **ACO MODIFICATION MODULE REHOST:** Change the IP address for the host machine in the TNS Names file for each ACO Mods user after the application is rehosted to the T520 (Elmer) in July 1998. Your District F Shop will notify you when to make this change.

To change this address, double click on My Computer (File Manager if you are running windows 3.1.1.). Double click on the Main or C-directory. Open the orawin\network\admin directory and find the tnsnames.ora file. The file should be changed as shown below:

```
ACOMOD=(DESCRIPTION=
  (ADDRESS=
    (PROTOCOL=TCP)(PORT=1601)(HOST=ELMER.COLS.DISA.MIL)
  )
```
